Email: faheemahmed.Developer@gmail.com

Phone: +92 3033083494

Professional Summary

Flutter Mobile Developer with **3 years of experience** building and shipping production mobile applications and **pixel-perfect UI implementation**. Expert in converting complex Figma designs into scalable mobile architectures. Proven track record in real-time tracking, offline-first functionality, and managing **end-to-end app deployment** for platforms serving **10,000+ users**.

Technical Skills

- **Programming Languages:** Dart, SQL
- **Mobile Development:** Flutter (Cross-platform), Pixel-Perfect UI, Material Design
- **Architecture & State Management:** MVVM, Clean Architecture, Repository Pattern, Bloc, GetX
- **Databases & Storage:** MySQL, PostgreSQL, SQLite (Isar), Firebase Firestore
- **Networking & Backend:** RESTful APIs, JSON, OAuth, Pusher, Push Notifications (FCM), Payment Gateway Integration
- **Maps & Location:** Google Maps SDK, Real-time Location Tracking
- **Tools & Platforms:** Xcode, Firebase Console, Play Console, App Store Connect, Git, GitHub, MySQL, Postman, Android Studio, VS Code

Professional Experience

Analyst Software Engineer

SNL Data Pvt Ltd

Karachi | Sep 2023 – Present

- Built and deployed the **BusCaro Passenger App** using **Flutter**, a B2B mobility platform for corporate commuters featuring real-time tracking and payment integration (**10,000+ downloads**).
- Developed the **BusCaro Captain App** using **Native Android (Kotlin)**, Hilt, and Room Database for driver operations and live trip updates (**1,000+ downloads**).
- **Reduced Google Maps API usage** by shifting route visualization and place search features.
- Implemented distance-based real-time location updates (~50m threshold) using Pusher to reduce unnecessary tracking events and **improve battery efficiency**.
- Built **offline-first functionality** with local storage and background synchronization for reliable app behavior in low-connectivity environments.
- Worked on **end-to-end mobile app development** from architecture to production deployment.

Junior Flutter Developer

Squarenex Technology Pvt Limited

Lahore | Dec 2022 – August 2023

- Developed **multiple mobile applications** using Flutter, integrating Firebase services and RESTful APIs for product and data management.
- Built and maintained **Carry Mastery**, a social-media-style application featuring Firebase Authentication, Cloud Firestore, and push notification functionality for real-time user engagement.
- Successfully delivered and **deployed 2 production-ready** mobile applications within 12 months, ensuring smooth release cycles and post-deployment stability.

Projects

- **[BusCaro Passenger App](#) (Flutter):** Corporate mobility application with real-time tracking and payment integration (10,000+ users)
- **[BusCaro Captain App](#) (Flutter):** Driver application with live location tracking and optimized update handling (1,000+ users)
- **[BusCaro Portal](#) (React js):** Web-based administration and management portal for the BusCaro ecosystem. Provides trip monitoring, user management, reporting, and operational oversight tools.
- **[Jaib App](#) (Flutter) & [Jaib Portal](#) (Flutter):** Developed a social media and rewards platform where users can watch advertisements and promotional content, earn rewards in their wallet, and engage with sponsored campaigns through an interactive mobile and web experience.
- **[Market App](#) (Flutter):** E-commerce application with payment integration and API-driven product catalog.
- **[NETS4U ERP](#) (React Js):** Developed a comprehensive ERP system for managing inventory, warehouses, sales, orders, suppliers, customers, and business operations through a centralized platform.
- **[Desollabs Web](#) (Next Js):** Developed the corporate website using Next.js. Focused on performance, responsiveness, SEO optimization, and modern user experience.
